## Summary

Final-semester Computer Science and Engineering student (CGPA 3.95/4.00) with 500+ algorithmic problems solved. Built full-stack and mobile applications with Next.js, PostgreSQL, MongoDB, and Flutter; building high-performance backend services and REST APIs with C#, ASP.NET Core, and Go. Seeking a Junior Software Engineer (Backend) role.

## Education

**Bangladesh University of Business and Technology (BUBT)**

**Dhaka, Bangladesh**

*B.Sc. in Computer Science and Engineering; CGPA: 3.95/4.00*

*Jan 2023 - Expected Dec 2026*

- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Distributed Database Systems, Operating Systems, Computer Networks, Software Engineering.

## Technical Skills

**Languages:** C, Go, C++, SQL, Python, JavaScript, TypeScript, Dart

**Backend & Web:** ASP.NET Core, EF Core, LINQ, SignalR, Identity, Gin, Goroutines, Channels, REST APIs, JWT

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase

**Web & Mobile:** Next.js, React, Flutter, Node.js, Express.js, Prisma ORM, Firebase, Tailwind CSS, REST APIs

**Architecture:** Clean Architecture, Repository Pattern, Dependency Injection, SOLID Principles, Design Patterns

**Testing:** xUnit, Moq, Postman

**DevOps & Cloud:** Git, GitHub, Docker, Kubernetes, GitHub Actions (CI/CD), Linux, Microsoft Azure, Vercel

**AI/ML:** PyTorch, Computer Vision, Medical Image Segmentation, Attention U-Net, Vision Transformers (ViT), Edge Impulse

## Projects

**FoodDrop** | *Next.js, TypeScript, PostgreSQL, Prisma, Leaflet*

**GitHub** | **Live Demo**

- Built a multi-role delivery platform (26 REST routes, 11 Prisma models) with JWT auth, state guards, and Leaflet GPS tracking.
- Implemented PIN-verified delivery, an automated COD cash ledger, and a multilingual AI recommendation assistant.

**short-go** | *Go, Gin, PostgreSQL, Redis, Docker*

**GitHub**

- Engineered a RESTful URL shortener in Go (Gin) using Base62 encoding for fast link generation and sub-millisecond redirection.
- Integrated Redis caching to handle high-read traffic, drastically cutting database lookups in PostgreSQL.
- Leveraged Goroutines for asynchronous click analytics logging, and containerized the setup with Docker Compose.

**KrishiBondhu – Smart Agriculture App** | *Flutter, Firebase, AI*

**GitHub**

- Built a mobile app with real-time weather forecasting, AI-based pest detection, fair price insights, and a peer-to-peer marketplace connecting farmers with verified buyers.

**Employee Management System** | *Python, CustomTkinter, MongoDB*

**GitHub**

- Developed a desktop application with CRUD operations, role-based access control, and MongoDB data storage.

**CityRide – Web Security Lab** | *PHP, MySQL, Burp Suite, SQLmap*

**GitHub**

- Built an intentionally vulnerable rideshare web app to practice penetration testing, then identified and mitigated SQL injection and CSRF vulnerabilities.

**Edge AI Smart Agriculture** | *ESP32-CAM, Edge Impulse, IoT*

- Built an automated irrigation and plant-disease detection system running Edge Impulse ML models on ESP32-CAM with DHT11 and soil-moisture sensors.

## Problem Solving & Achievements

**Competitive Programming:** Solved **500+** algorithmic problems across platforms; 3-time ICPC Dhaka Regional Preliminary contestant, securing **17th place** (Junior) and **30th place** (Senior) in BUBT Intra-University Contests.
